Hello,
It's Tasim, a developer based in Ruse, Bulgaria.
I am a team player, deeply believe that even the most challenging work can be done whit a smile. I work with dedication, positive energy, care, motivation and by personal example. I like to challenge myself and set me in one idea higher.

I graduated with a bachelor's degree in computer science, gained knowledge in many fields. As I have a knowledge in Frontend and including in backend. I can make awesome Websites whit attractive design and Web applications. I can also handle making information systems and mobile applications.

Words like empathy, dignity and respect mean a lot to me and I believe this is how we should communicate with each other no matter what position we hold professionally, we are people first and foremost. I believe it's key for a team (and companies in general) to share our knowledge, our good examples. So I want to be a good person firstly and successful in my career.

If you are interested, write me on ttasimer6@gmail.com or call me in: +359 89 272 9253.
I will look forward to hearing from you!
Greetings,
Tasim Tasim
